

# SAFETY DATA SHEET

United States		
Section 1. Identification Product name	Immobiline™ D	ryStrip pH 3-10, 11 cm
Catalogue Number	18101661	
Other means of identification Product type	Not available. Solid.	
Relevant identified uses of the su	ubstance or mixture and uses ad	vised against
<b>Identified uses</b> Analytical chemistry. Use in laboratories Scientific research and developm Industrial applications: Analytical	ent chemistry. Laboratory use. Scientifi	c research and development.
Supplier	Cytiva Amersham Place Little Chalfont Buckinghamshire HP7 9NA United Kingdom +44 0800 515 313	Cytiva USA 100 Results Way Marlborough, MA 01752 1-800-526-3593
In case of emergency	INFOTRAC - 24 Hour number: 1- Outside of the United States, call	800-535-5053 24 Hour number: 001-352-323-3500 (Call Collect)
Section 2. Hazards ident	ification	
OSHA/HCS status	CFR 1910.1200), this SDS contai	red hazardous by the OSHA Hazard Communication Standard (29 ns valuable information critical to the safe handling and proper use be retained and available for employees and other users of this
Classification of the substance or mixture	Not classified.	
	Percentage of the mixture consist Percentage of the mixture consist	ing of ingredient(s) of unknown acute oral toxicity: 95% ing of ingredient(s) of unknown acute dermal toxicity: 95% ing of ingredient(s) of unknown acute inhalation toxicity: 95% ing of ingredient(s) of unknown hazards to the aquatic
GHS label elements		
Signal word	No signal word.	
Hazard statements	No known significant effects or cr	tical hazards.
Precautionary statements		
Prevention	Not applicable.	
Response	Not applicable.	
Storage	Not applicable.	
Disposal	Not applicable.	
Hazards not otherwise classified	None known.	

Page: 1/7 Validation date 20 February 2023

## Section 3. Composition/information on ingredients

Substance/mixture	Mixture		
Other means of identification	Not available.		
CAS number/other identifiers			
CAS number	Not applicable.		

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First aid measures

#### Description of necessary first aid measures

Eye contact	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.				
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms				
Skin contact	may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.				
Ingestion	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.				
Most important symptoms/effect	s, acute and delayed				
Potential acute health effects					
Eye contact	No known significant effects or critical hazards.				
Inhalation	No known significant effects or critical hazards.				
Skin contact	No known significant effects or critical hazards.				
Ingestion	No known significant effects or critical hazards.				
Over-exposure signs/symptom	<u>s</u>				
Eye contact	No specific data.				
Inhalation	No specific data.				
Skin contact	No specific data.				
Ingestion	No specific data.				
Indication of immediate medical	attention and special treatment needed, if necessary				
Notes to physician	In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.				
Specific treatments	No specific treatment.				
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.				
See toxicological information (Se	ection 11)				
Section 5. Fire-fighting m	neasures				
Extinguishing media					
Suitable extinguishing media	Use an extinguishing agent suitable for the surrounding fire.				
Unsuitable extinguishing media	None known.				
Specific hazards arising from the chemical	No specific fire or explosion hazard.				
Hazardous thermal decomposition products	Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides				
Special protective actions for fire-fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.				
Special protective equipment	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCRA) with a full face piece operated in positive pressure mode				

(SCBA) with a full face-piece operated in positive pressure mode.

Special protective equipment for fire-fighters

## Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
For emergency responders	If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and materials for conta	inment and cleaning up
Small spill	Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.
Large spill	Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

Precautions for safe handling	
Protective measures	Put on appropriate personal protective equipment (see Section 8).
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	Do not store above the following temperature: -20°C (-4°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

# Section 8. Exposure controls/personal protection

1	• •
Control parameters	
Occupational exposure limits None.	
Appropriate engineering controls	Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measures	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection	
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

# Section 9. Physical and chemical properties

Appearance Physical state Color Odor Odor threshold pH Melting point/freezing point Boiling point, initial boiling point, and boiling range	Solid. [Polyacrylamide Gel] Colorless. Odorless. Not available. Not available. Not available. Not available. Not available.	
Flash point	Not applicable.	
Burning time	Not available.	
Burning rate	Not available.	
Evaporation rate	Not available.	
Flammability	Not available.	
Lower and upper explosive (flammable) limits	Not available.	
Vapor pressure	Not available.	
Relative vapor density Relative density Solubility(ies)	Not available. Not available.	
Me	dia	Result
= =	ld water t water	Not soluble Not soluble
Solubility in water	Not available.	
Partition coefficient: n-octanol/ water	Not available.	
Auto-ignition temperature	Not available.	
Decomposition temperature	700°C (1292°F)	
SADT	Not available.	
Viscosity	Not available.	
Flow time (ISO 2431)	Not available.	
Particle characteristics Median particle size	Not available.	

# Section 10. Stability and reactivity

Reactivity Chemical stability	No specific test data related to reactivity available for this product or its ingredients. The product is stable.
Possibility of hazardous reactions Conditions to avoid	Under normal conditions of storage and use, hazardous reactions will not occur. No specific data.
Incompatible materials Hazardous decomposition	No specific data. No specific data. Under normal conditions of storage and use, hazardous decomposition products should not be
products	produced.

# Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity Not available.

Irritation/Corrosion

Not available.

Sensitization Not available.

Mutagenicity Not available.

**Carcinogenicity** 

Not available.

#### Reproductive toxicity Not available.

**Teratogenicity** 

Not available.

## Specific target organ toxicity (single exposure)

Not available.

## Specific target organ toxicity (repeated exposure)

# Not available.

### Aspiration hazard

Not available.

Information on the likely routes Routes of entry anticipated: Oral, Dermal, Inhalation. of exposure

#### Potential acute health effects

Eye contact	No known significant effects or critical hazards.
Inhalation	No known significant effects or critical hazards.
Skin contact	No known significant effects or critical hazards.
Ingestion	No known significant effects or critical hazards.
Symptoms related to the physica	I, chemical and toxicological characteristics
Eye contact	No specific data.
Inhalation	No specific data.
Skin contact	No specific data.
Ingestion	No specific data.
Delayed and immediate effects a	nd also chronic effects from short and long term exposure
Short term exposure	
Potential immediate effects	Not available.
Potential delayed effects	Not available.
Long term exposure	
Potential immediate effects	Not available.
Potential delayed effects	Not available.
Potential chronic health effects	
Not available.	
General	No known significant effects or critical hazards.
Carcinogenicity	No known significant effects or critical hazards.
Mutagenicity	No known significant effects or critical hazards.
Reproductive toxicity	No known significant effects or critical hazards.
Numerical measures of toxicity	
Acute toxicity estimates	
N/A	

## Section 12. Ecological information

Toxicity

Not available.

# Persistence and degradability

#### Not available. Bioaccumulative potential

Not available.

Mobility in soil

Soil/water partition coefficient (K Not available.

Other adverse effects

No known significant effects or critical hazards.

## Section 13. Disposal considerations

Disposal methods	The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
------------------	--

## Section 14. Transport information

Product is not regulated as dangerous goods for transport.
