

# SAFETY DATA SHEET

United States

Section 1. Identification Product name

# HiTrap<sup>™</sup> MabSelect SuRe<sup>™</sup> LX, 5 x 1 ml

**Catalogue Number** 29268402 Other means of identification Not available. Product type

Liquid.

Relevant identified uses of the substance or mixture and uses advised against

#### Identified uses

Laboratory chemicals Liquid chromatography. Scientific research and development Industrial applications: Analytical chemistry. Scientific research and development. Liquid chromatography.

#### Supplier

Cytiva Amersham Place Little Chalfont Buckinghamshire HP7 9NA United Kingdom +44 0800 515 313

Cytiva USA 100 Results Way Marlborough, MÁ 01752 1-800-526-3593

In case of emergency

INFOTRAC - 24 Hour number: 1-800-535-5053 Outside of the United States, call 24 Hour number: 001-352-323-3500 (Call Collect)

# Section 2. Hazards identification

| OSHA/HCS status                                | This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).  |
|--|--|
| Classification of the substance<br>or mixture  | FLAMMABLE LIQUIDS - Category 3   |
| <u>GHS label elements</u><br>Hazard pictograms |  |
| Signal word                                    | Warning  |
| Hazard statements                              | Flammable liquid and vapor.  |
| Precautionary statements                       |  |
| Prevention                                     | Wear protective gloves: 1 - 4 hours (breakthrough time): butyl rubber, neoprene. Wear protective clothing: Recommended: lab coat. Wear eye or face protection: Recommended: safety glasses with side-shields. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Keep container tightly closed. |
| Response                                       | IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.   |
| Storage  | Store in a well-ventilated place. Keep cool.   |
| Disposal                                       | Dispose of contents and container in accordance with all local, regional, national and international<br>regulations.   |
| Hazards not otherwise<br>classified            | None known.  |

Article Number :

Page: 1/8 Validation date 10 October 2023

# Section 3. Composition/information on ingredients

| Substance/mixture<br>Other means of identification | Mixture<br>Not available. |                     |                       |
|--|---------------------------|---------------------|-----------------------|
| CAS number/other identifiers<br>CAS number         | Not applicable.           |                     |                       |
| Ingredient name<br>ethanol                         |                           | <b>%</b><br>14 - 19 | CAS number<br>64-17-5 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necessary first ai | d measures  |
|-----------------------------------|---|
| Eye contact                       | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.                           |
| Inhalation                        | Remove victim to fresh air and keep at rest in a position comfortable for breathing.  |
| Skin contact                      | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.  |
| Ingestion                         | Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. |
| Most important symptoms/effec     | ts, acute and delayed   |
| Potential acute health effects    |   |
| Eye contact                       | No known significant effects or critical hazards.   |
| Inhalation                        | No known significant effects or critical hazards.   |
| Skin contact                      | No known significant effects or critical hazards.   |
| Ingestion                         | No known significant effects or critical hazards.   |
| Over-exposure signs/symptom       | <u>15</u>   |
| Eye contact                       | No specific data.   |
| Inhalation                        | No specific data.   |
| Skin contact                      | No specific data.   |
| Ingestion                         | No specific data.   |
| Indication of immediate medical   | attention and special treatment needed, if necessary  |
| Notes to physician                | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have<br>been ingested or inhaled.  |
| Specific treatments               | No specific treatment.  |
| Protection of first-aiders        | No action shall be taken involving any personal risk or without suitable training.  |
| See toxicological information (S  | ection 11)  |

# Section 5. Fire-fighting measures

### Extinguishing media

| Suitable extinguishing media                      | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
|---|--|
| Unsuitable extinguishing media                    | Do not use water jet.  |
| Specific hazards arising from the chemical        | Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.  |
| Hazardous thermal decomposition products          | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide   |
| Special protective actions for<br>fire-fighters   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.<br>No action shall be taken involving any personal risk or without suitable training. Move containers<br>from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment<br>for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |
|   |  |

29268402

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel      | No action shall be taken involving any personal risk or without suitable training. Evacuate<br>surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or<br>walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard<br>area. Put on appropriate personal protective equipment.   |
|----------------------------------|--|
| For emergency responders         | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions        | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.<br>Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for contai | inment and cleaning up   |
| Small spill                      | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-<br>proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble,<br>absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of<br>via a licensed waste disposal contractor.   |
| Large spill                      | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-<br>proof equipment. Approach release from upwind. Prevent entry into sewers, water courses,<br>basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows.<br>Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite<br>or diatomaceous earth and place in container for disposal according to local regulations (see<br>Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material<br>may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact<br>information and Section 13 for waste disposal. |

# Section 7. Handling and storage

| Precautions for safe handling                                   |   |
|---|---|
| Protective measures   | Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general occupational hygiene                          | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored<br>and processed. Workers should wash hands and face before eating, drinking and smoking.<br>Remove contaminated clothing and protective equipment before entering eating areas. See also<br>Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any incompatibilities | Store between the following temperatures: 2 to 8°C (35.6 to 46.4°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

# Section 8. Exposure controls/personal protection

#### Control parameters

Occupational exposure limits Ingredient name

ethanol

#### Exposure limits

ACGIH TLV (United States, 1/2022). Notes: 1996 Adoption Refers to Appendix A -- Carcinogens. STEL: 1000 ppm 15 minutes. NIOSH REL (United States, 10/2020). Notes: TWA: 1900 mg/m³ 10 hours. NIOSH REL (United States, 10/2020). TWA: 1000 ppm 10 hours. OSHA PEL (United States, 5/2018). TWA: 1900 mg/m³ 8 hours. TWA: 1000 ppm 8 hours. OSHA PEL 1989 (United States, 3/1989). TWA: 1900 mg/m³ 8 hours. TWA: 1000 ppm 8 hours.

#### **Biological exposure indices**

No exposure indices known.

| Appropriate engineering<br>controls<br>Environmental exposure<br>controls | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |
|---|--|
| Individual protection measures  |  |
| Hygiene measures  | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection   | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. Recommended: safety glasses with side-shields  |
| Skin protection   |  |
| Hand protection   | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. 1 - 4 hours (breakthrough time): butyl rubber, neoprene                                     |
| Body protection   | Personal protective equipment for the body should be selected based on the task being performed<br>and the risks involved and should be approved by a specialist before handling this product. When<br>there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest<br>protection from static discharges, clothing should include anti-static overalls, boots and gloves.<br>Recommended: lab coat  |
| Other skin protection   | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection  | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: A respirator is not needed under normal and intended conditions of product use.  |
| Personal protective<br>equipment (Pictograms)                             |  |

# Section 9. Physical and chemical properties

### Appearance

|   | Ingredient name      | mm Hg         | kPa        | Method      | mm Hg | kPa       | Method       |
|---|----------------------|---------------|------------|-------------|-------|-----------|--------------|
|   |                      | Va            | por Press  | ure at 20°C | Va    | apor pres | sure at 50°C |
| Vapor pressure  | Not available.       |               |            |             |       |           |              |
| Lower and upper explosive (flammable) limits            | Not available.       |               |            |             |       |           |              |
| Flammability  | Not available.       |               |            |             |       |           |              |
| Evaporation rate  | Not available.       |               |            |             |       |           |              |

# Section 10. Stability and reactivity

| Reactivity<br>Chemical stability      | No specific test data related to reactivity available for this product or its ingredients.<br>The product is stable.  |
|---------------------------------------|---|
| Possibility of hazardous<br>reactions | Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                   | Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials                | Reactive or incompatible with the following materials:<br>oxidizing materials   |
| Hazardous decomposition<br>products   | Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

# Section 11. Toxicological information

### Information on toxicological effects

| Acute toxicity<br>Product/ingredient name<br>ethanol | <b>Result</b><br>LC50 Inhalation Vapor | <b>Species</b><br>Rat    | <b>Dose</b><br>124700 mg/m³ | Exposure<br>4 hours |

| Disposal methods | The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
