

# SAFETY DATA SHEET

United States

### Section 1. Identification Product name

# Wash buffer #1 - part of 'Sera-Xtracta HMW **DNA Kit'**

**Catalogue Number** 

29429140

Other means of identification Not available. Product type

Liquid.

#### Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Use in laboratories

Industrial applications: Analytical reagent. Research.

#### Supplier

Cytiva Amersham Place Little Chalfont Buckinghamshire HP7 9NA United Kingdom +44 0800 515 313

Cytiva USA 100 Results Way Marlborough, MA 01752 1-800-526-3593

In case of emergency

INFOTRAC - 24 Hour number: 1-800-535-5053 Outside of the United States, call 24 Hour number: 001-352-323-3500 (Call Collect)

# Section 2. Hazards identification

| OSHA/HCS status                            | This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |
|--|---|
| Classification of the substance or mixture | ACUTE TOXICITY (oral) - Category 4<br>SKIN IRRITATION - Category 2<br>EYE IRRITATION - Category 2A  |
|  | Percentage of the mixture consisting of ingredient(s) of unknown acute oral toxicity: 5%<br>Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 70%<br>Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation toxicity: 70%<br>Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic<br>environment: 70% |
| GHS label elements                         |   |
| Hazard pictograms                          |   |
| Signal word                                | Warning   |
| Hazard statements                          | Harmful if swallowed.<br>Causes serious eye irritation.<br>Causes skin irritation.  |
| Precautionary statements                   |   |
| Prevention                                 | Wear protective gloves. Wear eye or face protection. Do not eat, drink or smoke when using this   |

Wear protective gloves. Wear eye or face protection. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling.

### Wash buffer #1 - part of 'Sera-Xtracta HMW DNA Kit'

| · · · · · · · · · · · · · · · · · · · |   |
|---------------------------------------|---|
| Response                              | IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. |
| Storage                               | Not applicable.   |
| Disposal                              | Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazards not otherwise<br>classified   | None known.   |
| Section 3. Composition                | on/information on ingredients   |
| ubstance/mixture                      | Mixture   |

| Substance/mixture             | Mixture         |  |
|-------------------------------|-----------------|--|
| Other means of identification | Not available.  |  |
| CAS number/other identifiers  |                 |  |
| CAS number                    | Not applicable. |  |

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

### Description of necessary first aid measures

| Eye contact  | Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|--------------|--|
| Inhalation   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention   |

immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

| Most important symptoms/effects, acute and delayed                                   |  |  |
|--|--|--|
| Potential acute health effects   |  |  |
| Eye contact  | Causes serious eye irritation.   |  |
| Inhalation   | No known significant effects or critical hazards.  |  |
| Skin contact   | Causes skin irritation.  |  |
| Ingestion  | Harmful if swallowed.  |  |
| Over-exposure signs/symptoms   |  |  |
| Eye contact  | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |  |
| Inhalation   | No specific data.  |  |
| Skin contact   | Adverse symptoms may include the following:<br>irritation<br>redness   |  |
| Ingestion  | No specific data.  |  |
| Indication of immediate medical attention and special treatment needed, if necessary |  |  |
| Notes to physician<br>Specific treatments  | In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. No specific treatment. |  |
| •  |  |  |
| Protection of first-aiders   | No action shall be taken involving any personal risk or without suitable training. It may be<br>dangerous to the person providing aid to give mouth-to-mouth resuscitation.                |  |

29429140-4

Page: 2/8 Validation date 12 July 2021

# Section 5. Fire-fighting measures

See toxicological information (Section 11)

### Extinguishing media

| Suitable extinguishing media                      | Use an extinguishing agent suitable for the surrounding fire.   |
|---|---|
| Unsuitable extinguishing media                    | None known.   |
| Specific hazards arising from the chemical        | In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal<br>decomposition products       | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>halogenated compounds  |
| Special protective actions for<br>fire-fighters   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment<br>for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                         |

### Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel                           | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.  |  |
|---|---|--|
| For emergency responders                              | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |  |
| Environmental precautions                             | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.<br>Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways,<br>soil or air).   |  |
| Methods and materials for containment and cleaning up |   |  |
| Small spill   | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-<br>soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an<br>appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |  |
| Large spill   | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent<br>entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent<br>treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent<br>material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal<br>according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor.<br>Contaminated absorbent material may pose the same hazard as the spilled product. Note: see<br>Section 1 for emergency contact information and Section 13 for waste disposal. |  |

# Section 7. Handling and storage

| Precautions for safe handling                                   |   |
|---|---|
| Protective measures   | Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.   |
| Advice on general occupational hygiene                          | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any incompatibilities | Store in accordance with local regulations. Store in original container protected from direct sunlight<br>in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food<br>and drink. Keep container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled<br>containers. Use appropriate containment to avoid environmental contamination. See Section 10 for<br>incompatible materials before handling or use. |

# Section 8. Exposure controls/personal protection

| Control parameters   |  |
|--|--|
| Occupational exposure limits<br>guanidinium chloride<br>trometamol | None.<br>None.   |
| Appropriate engineering<br>controls                                | Good general ventilation should be sufficient to control worker exposure to airborne contaminants.   |
| Environmental exposure controls                                    | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measures                                     |  |
| Hygiene measures   | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection  | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.   |
| Skin protection  |  |
| Hand protection  | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Body protection  | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection  | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection   | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |

### Section 13. Disposal considerations

**Disposal methods** The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

Product is not regulated as dangerous goods for transport.
